

Your Questions Answered

Trusted Formulas, New Look

Q Who is Allergy Research Group?

A For 45 years, Allergy Research Group (ARG) has supported healthcare practitioners and their patients with the tools necessary to achieve the confidence that comes from great health. Their tireless dedication to creating clinically sound, evidence-based, condition-specific formulas using clean, hypoallergenic ingredients is unsurpassed—and it's why their supplements are so widely trusted and well-tolerated by both practitioners and patients worldwide.

Metabolic Maintenance and MethylPro were acquired by ARG in January 2025. This acquisition represents a natural fit between companies that share similar values and a passion for improving the health and well-being of those who rely on our products. Now we will be able to provide even more comprehensive solutions to the practitioners and patients we serve, with a specific focus on the increasingly important categories of stress management, mental wellness and resilience.

Q Why are all the products now under the Allergy Research Group (ARG) name?

A Bringing everything under ARG makes it easier for you and your healthcare practitioner to find and trust your supplements. While ARG has been a leader in hypoallergenic supplements, we now offer a broader range to support mental wellness and resilience as well as condition-specific formulas. It's the same science, now in under one trusted brand.

Q Will the Metabolic Maintenance and MethylPro product formulas change under the ARG label?

A No and yes. After careful review, the Quality and Medical Teams identified, in a few instances, opportunities to update formulas based on a commitment to continuous improvement and relevant science. You'll still receive the high-quality ingredients, carefully designed formulations, and rigorous testing that Metabolic Maintenance, MethylPro, and ARG have always stood for.

Q Why did the bottles change from brown glass to HDPE?

A Earlier this year, we reached out to our customers to explore ways we could reduce our packaging and, by doing so, reduce our carbon footprint. What we heard was that this issue is as important to you as it is to us. Based on this feedback we took the following steps – Starting on October 1st, your products will be delivered in safe, high-density polyethylene (HDPE) bottles which are industry-standard recyclable bottles and are free of BPA, phthalates, heavy metals, and allergens. In short, HDPE packaging is safer, lighter, more sustainable, and protective, without sacrificing quality.

Here's how this change affects you and the environment:

- **Better heat protection:** Unlike glass, HDPE doesn't transfer heat as easily. This helps protect sensitive nutrients and maintain stability, especially during hot weather and shipping. HDPE also has the benefit of being one of the most stable, least reactive materials for product packaging.
- **More protection, less waste:** Glass can chip or break during production and shipping, which leads to ruined products and delayed delivery and higher costs to you. HDPE bottles are durable, reducing the need for extra packaging by 50%-80% on average.
- **Eco-friendly shipping & manufacturing:** Glass is three times heavier than HDPE. Using lighter HDPE reduces fuel use and carbon emissions during shipping, and it also requires less energy to produce. HDPE is recyclable, commonly accepted in curbside recycling programs.

We understand this may feel like a big change, but please be assured—this change in packaging does not affect product quality in any way.

Q Will the Metabolic Maintenance and MethylPro products still be manufactured in the same facilities?

A No. ARG has maintained or improved manufacturing standards and products will continue to be produced in certified cGMP facilities using the same, and in some instances more, rigorous testing standards. ARG maintains strict quality-control standards with an emphasis on being hypoallergenic, consistent, and stable. We remain committed to delivering professional-grade supplements you can trust.

Q How will I recognize my favorite Metabolic Maintenance or MethylPro product under the ARG label?

A We've taken care to ensure that product names, strengths and formulas remain consistent. You will now see a small Metabolic Maintenance or MethylPro logo on the front panel of the ARG labels for a transition period to make it clear that these products were formerly Metabolic Maintenance or MethylPro products. If you're shopping on the ARG website, we've also created Metabolic Maintenance and MethylPro product "Collections" in the Product drop-down menu at the top of the website.

Q Will prices change under the new ARG labels?

A No. Prices will remain consistent. Customers may also benefit from ARG's expanded promotions, subscriptions, and free shipping opportunities as part of the unified brand experience.

Q Where can I get more information?

A Visit AllergyResearchGroup.com or contact our Customer Service Team by phone (800) 545-9960 or email (questions@ARGformulas.com) and we will be happy to assist you. We're here to answer questions and ensure this transition is smooth and reassuring for you.

Q Has the 60-day Satisfaction Guarantee been altered as a result of these label changes?

A No. There will be no changes in the 60-day Satisfaction Guarantee ensuring you can continue to rely on the high-quality products you know and trust.

Q I did not receive an email to update my account. What should I do?

A Please contact our Customer Service Team by phone (800) 545-9960 or email (questions@ARGformulas.com) and we will be happy to assist you.
